**INTERNATIONAL JUTE STUDY GROUP**

The HS Codes for jute and jute products suggested in this report are recommendatory in nature and should not be treated as final approved codes for these products.

# **Harmonised System Suggested Codes for Jute and Jute Products & Product Descriptions**

## **Preface**

The Harmonized Commodity Description and Coding System [Harmonized System-HS] of commodity classification developed by the World Customs Organization (WCO), Brussels has been in use throughout the world since the late 1980s. Each item is categorized under a definite code number which facilitates its identification and makes its trade and trans-border transportation easy and free from complexities. As per WCO procedures, the HS codes beyond 6 digit level are country-specific ones. Each country has its priorities of sub-dividing the sub heading of HS Codes. The same code may, therefore, mean different products from country to country.

Jute and jute products are mainly produced by Bangladesh, India, China, Thailand, Nepal and Myanmar. Jute and jute products have been assigned HS Code numbers by the respective Customs Organizations mainly based on the request and demand from traders and consumers. It is advantageous for the producing countries to use the same HS codes for the same product to the extent feasible. This will also help traders and consumers in importing countries. It is also observed that descriptions of the same jute product of different countries are not uniform as some have described one item briefly and some have described elaborately. This also creates problem in fully understanding the items.

To make the system simple and free from confusion, the Secretariat of the International Jute Study Group (IJSG) felt it is necessary to prepare Common HS Codes for jute and jute products which could be used by all concerned in an effective way.

The broad objective is to facilitate the preparation of Common draft HS Codes with product descriptions to avoid confusion among the traders and consumers for easy marketability of jute products. The final decision to accept these recommendations will be taken by the respective Governments.

In view of the above the IJSG Secretariat placed a project proposal entitled “**Preparation of Common HS Codes for Jute and Jute Products including Product Descriptions**” in the Third meeting of the Committee on Projects (COP) held on 20-21 October, 2003 which was approved.

The IJSG Secretariat organized the first Working Group meeting on the preparation of Common HS Codes at its Headquarters in Dhaka on 28 January 2004 under the chairmanship of Mr. Md. Abdur Rahim, Secretary, Ministry of Jute, Government of the People’s Republic of Bangladesh. The representatives from Ministry of Jute, Ministry of Commerce, National Board of Revenue (NBR), Federation of Bangladesh Chamber of Commerce and Industries (FBCCI), Bangladesh Jute Mills Association (BJMA), Bangladesh Jute Association (BJA), Bangladesh Jute Mills Corporation (BJMC), Bangladesh Tariff Commission (BTC), Bangladesh Standards and Testing Institute (BSTI), Controller of Imports and Exports (CI&E) attended the meeting.

It was decided that in the meeting efforts will be made to harmonize the description and code numbers within the parameters set by WCO and alignment to the descriptions with the international organizations will be attempted to the extent possible.

The Second Working Group meeting was held in Kolkata on 25 February 2004 under the chairmanship of Mr. S. Majumder, Jute Commissioner, Ministry of Textiles, Government of India. The meeting was attended by the Secretary General of IJSG, Commissioner of Customs (Port), Kolkata representatives of National Centre for Jute Diversification (NCJD), Jute Manufacturers Development Council (JMDC), Bureau of Indian Standards (BIS), Directorate General of Commercial Information and Statistics (DGCI&S), Directorate of Foreign Trade (DGFT), Indian Jute Mills Association (IJMA), Calcutta Jute Fabrics Shippers Association (CJFSA), Ambica Multifiber Ltd.

The representatives felt it is necessary that harmonization of codes of both India and Bangladesh as well as other jute/kenaf producing countries will improve trading opportunities and facilitate business developments. It was also felt necessary that the new diversified jute products may be classified for consideration on their predominance in essential character and application. Furthermore, jute items or products that do not have specific code numbers could be fitted in at appropriate places between existing codes. It was also decided that the 6 digits codes have to follow exactly the same description /codes of WCO and with a view to improving the understanding of jute products, some descriptions will be explained/ clarified whenever necessary.

The Third Joint Working Group Meeting was held under the Chairmanship of Mr. T. Nanda Kumar, Secretary General, IJSG on 28 July 2004 at IJSG Secretariat, Dhaka. The meeting was attended by Mr. S. Majumdar, Jute Commissioner, Ministry of Textiles, Government of India, Mr. A.K. Das, Commissioner of Customs (Port) Kolkata, Mr Ashish Kumar Paul, Deputy Secretary, Ministry of Textile and Jute, Government of Bangladesh, Mr. Atiqur Rahman, First Secretary, Customs, Policy and Budget, National Board of Revenue (NBR), Dhaka and Mrs. Reba Rani Saha, Deputy Controller, Office of the Controller of Imports and Exports, Ministry of Commerce, Government of Bangladesh.

It was decided in the meeting that an Expert Drafting Committee be formed under the chairmanship of Mr. S. Majumder, Jute Commissioner, Government of India with Mr. Atiqur Rahman, NBR, Dhaka and Mr. A. K. Das, Commissioner of Customer (Port) Kolkata as members to finalize the report.

Based on the recommendations of the meetings and the report of the Expert Drafting Committee, the final report of the Compilation of Harmonized System (HS) Codes for Jute and Jute Products & Product Description has been prepared.

This report is recommendatory in nature and the governments concerned may adopt these suggestions to extent feasible.
